

DIZZION SERVICES OVERVIEW

Virtual Desktops Evolved

About Dizzion

Dizzion is a global provider of end-user computing services, including cloud-delivered Desktops as a Service (DaaS) and complementary offerings. Dizzion delivers the next generation of virtual desktop solutions to meet the demands of a remote global workforce in industries with stringent security and compliance needs. Dizzion's mission is to enable users to securely access applications and data from any device, anywhere, anytime, increasing mobility and productivity.

Services

Cloud Delivered Desktops

Dizzion's cloud delivered desktops eliminate the complexity of traditional desktop management and in-house VDI solutions by offering a fully-managed, secure end user computing platform. Enable employees and contractors anywhere to work in a controlled desktop environment with access to business-critical applications and data, even with work at home and BYOD programs.

Compliance

End users and endpoint devices are two major compliance risk factors within regulated industries. Dizzion offers independently verified PCI and HIPAA HITECH compliant virtual desktops to help organizations more easily achieve and maintain compliance and complete future audits.

Application Delivery

Optimize user experience and prevent desktop bloat by separating end user applications from Dizzion's cloud delivered desktops with virtual application delivery. Application streaming allows faster delivery of app through centralized management and provisioning and keeps Golden Images more manageable.

Security & Controls

Our solutions include multi-tiered security, covering every layer of the virtual desktop infrastructure. Dizzion's virtual desktop solutions feature more than 100 customizable security controls to restrict desired actions, enabling tight end user and endpoint security.

Storage

Enable users to share, store and collaborate on files within their cloud delivered desktop experience. Dizzion's high performance cloud storage options help ensure company documents and IP remain secure.

Secure Endpoint Solutions

Control the cost of devices and remove the burdens of endpoint security, support and maintenance by coupling Dizzion's cloud delivered desktops with one of our secure managed endpoint solutions. Dizzion offers several proprietary zLink endpoint solutions to fit a range of access and feature needs.

Dizzion Cloud Delivered Desktop Use Cases

Use Case	Challenge	Benefit
Contact Centers	<ul style="list-style-type: none">• Support work at home programs• Access geographically disperse talent• Meet compliance standards• Scale with seasonality	<p>Quickly and easily get agents working within a secure environment from anywhere, on any device.</p> <p>Spin up desktops to support seasonal spikes, then spin them down once the spike is over.</p>
Third Party Contractors	<ul style="list-style-type: none">• Giving contractors access to necessary applications and data• Ensuring contractors are working from secure, compliant environments	<p>Customize a desktop Golden Image specifically for contractors, giving them easy access to exactly the applications and data they need.</p> <p>Sensitive data and company IP remain within a secure virtual environment at all time – never stored on the local device.</p>
Disaster Recovery & Business Continuity	<ul style="list-style-type: none">• Enabling employees to continue working when they can't access a physical location or device	<p>Cloud delivered desktops are accessible anywhere, anytime, from any device. All employees need to access their desktop is an internet-enabled device.</p>
Work at Home Programs	<ul style="list-style-type: none">• IT management without easy access to devices• Remote application patching & updating• Data security	<p>Easily manage desktop provision and maintenance from a single location without touching individual devices.</p> <p>Grant remote employees access to the applications and data they need with a secure, controlled virtual environment.</p>
PCI & HIPAA HITECH Compliance	<ul style="list-style-type: none">• Ensuring end users and endpoints meet strict compliance standards• Completing compliance audits	<p>Dizzion offers PCI & HIPAA HITECH compliant virtual desktop solutions that have been independently verified.</p> <p>These compliant solutions make achieving and maintaining compliance and completing audits easier.</p>
Mergers & Acquisitions	<ul style="list-style-type: none">• Simplify networking• Quickly grant application and data access to all new users to maintain productivity• Ensure consistent security	<p>With virtual desktops, centralized IT teams can extend app and data access as well as security measures to all employees without the time-consuming task of touching each individual device.</p>
