

CLOUD SOLUTIONS & DESKTOPS

For Legal Firms & Service Providers

Legal Organizations Face Unique Challenges

Law firms and legal service providers face a unique set of challenges that require specific tech solutions:

- **Information Security** - While all industries are concerned about security, almost all the information a legal organization handles is confidential, making security an even more vital component.
- **Fluctuating Workloads** - Case loads and demand for service aren't always consistent. That makes staffing difficult and often requires using third party contractors.
- **Working Remote** - Whether it's contractors working from home or full time employees traveling for work, legal professionals need constant, secure access to vital information.
- **Legal Documents & Applications Aren't Light** - Legal paperwork isn't light. Organizations often lose precious (and costly) time waiting for large files to transfer and download, especially for remote workers.

This unique set of challenges, coupled with the fact that many legal organizations have limited in-house IT support, makes finding the right legal tech solutions vital to effectiveness, efficiency and the bottom line.

Dizzion's Legal Tech Solution

Dizzion's full suite of end user computing solutions, including verified compliant desktop options, help directly address the key challenges of the legal industry.

Custom built with security in mind, our infrastructure, cloud delivered desktops and additional cloud solutions make it easy to deliver high performing, high availability virtual desktops, application streaming and cloud storage that work together flawlessly.

Dizzion's secure virtual desktop solutions allow everyone from full time employees to part time contractors to work within a consistent, secure desktop environment with quick access to necessary information and applications anytime, anywhere, from any device (including BYOD). The entire Dizzion solution is wrapped in multi-layered security (covering the end point to the data center), helping legal organizations feel confident that their data is secure at every point in the data handling process. Dizzion also offers virtual desktop solutions that have been independently audited and verified as PCI and HIPAA compliant, making it easier to meet client requests for compliant services.

Key Benefits

Easy Management

Dizzion makes it easy to implement and maintain Dizzion solutions without a large in-house IT team.

Secure the Endpoint

Protect against device theft or loss and control where data resides by getting it off the endpoint.

Security & Controls

More than 100 user controls to limit exactly what employees see and what actions they can take.

High Performance

Purpose-built for speed on infrastructure that delivers 99.99% availability.

Device Agnostic

Access via desktops, laptops, tablets, thin/zero clients and even smart phones. Ideal for BYOD and Work@Home employees.

Compliant Desktops

Independently verified PCI & HIPAA compliant cloud delivered desktops available, making it easier to meet client requirements.

CLOUD SOLUTIONS & DESKTOPS

For Legal Firms & Service Providers

BENEFITS FOR LEGAL FIRMS & SERVICE PROVIDERS

CHALLENGE	FEATURE	BENEFIT
Fluctuating workloads	Easily provisioned virtual desktops	Spin up virtual desktops as needed to support workload, then roll them back when projects are done
Limited internal IT resources	Pre-, implementation and post-launch support with 24x7x365 customer service	An easy-to-implement and manage solution that doesn't require large in-house IT teams
Keeping sensitive information secure	Multi-layered security and more than 100 user controls	Keep information and data secure by limiting the actions end users can perform and keeping data off the endpoint
Supporting contract workers	Fully managed cloud delivered desktops accessible from any device – including thin/zero clients, BYOD & Dizzion's secure endpoint solution: zLink	A secure connection to your controlled desktops, data and applications accessible anytime, any where, from any device – ideal for contractors and W@H employees
Managing large files	zFileShare & zFileStore – Dizzion's high performance cloud storage and collaboration services	Allow employees to quickly and easily work with large documents without extended download times.
Supporting legacy applications	Dizzion's virtual application streaming coupled with Dizzion's managed virtual desktops	Organizations can keep using business-critical legacy apps, without costly hardware upgrades to support new operating systems
Meeting client demands for compliance	Independently audited and verified PCI and HIPAA compliant virtual desktops	Making meeting compliance demands easier by relying on Dizzion's verified compliant solutions and documentation

Dizzion's Cloud Solutions Are Ideal For ...

- Law and legal firms
- Auditing companies
- Legal review servicers
- Other legal industry services & professionals
- Claims processors
