### INDUSTRY-LEADING COMPLIANCE FOR REGULATED REMOTE WORK

Corporate headquarters. The beach house.  
The coffee shop. The kitchen table. Any couch.

Why are Dizzion end users so happy?  
Forget oysters. The world is their office.

If you are reading this, chances are your team is planning a long-term remote work initiative. It's a big deal. It has the attention of leadership and will affect every end user.

Enabling successful remote work is a daunting task. It's difficult to stay secure and compliant with team members using personal computers to access corporate networks and sensitive data. They just want to work. You have to figure out the rest.

Fortunately, Dizzion has been helping organizations like yours solve remote work challenges since 2011. Our high-performance, secure and compliant cloud desktops will keep end users happy and successful while you protect the org.

Free your team from office workstations.  
Stream their desktops like a Netflix movie.

Whether you go back to the office or not, now is the time to redefine the way your team works. With Dizzion, end users secure-stream their full office environment from the cloud of their choice (AnyCloud) to wherever they need to work that day.

Dizzion is the Netflix of desktops. Pull up a browser. Login to your Dizzion desktop. Windows launches as if you were in the office sitting at your desk. Everything functions the same - or better - than actually being there. Forgot your laptop? Dizzion enables secure access from almost any connected device.

*“Dizzion Managed DaaS enables us to respond faster and more effectively to unpredictable business change. Their proven global performance means our steak experts are able to deliver the same best-in-class service, working from home.”*
